Product datasheet

Aqua Safe Non Slip Flooring

Our aqua-safe & non abrasive anti slip tape range has a unique non slip coating to ensure an effective non slip flooring, yet has a smoother surface for walking bare foot on and no abrasion to prevent damage to skin, material or wet suits. Non slip flooring in a wet or marine environment has always been a challenge, yet with our aqua safe you can easily obtain a good non slip surface with our non abrasive non slip tape. This non slip safety flooring is ideal for use in food safety areas, due to its lack of abrasive peaks and valleys and is a unique product. The product is ideal for use on any wet areas as a non slip surface, suitable for use as non slip bathroom flooring on tiles or as a non slip surface round swimming pools, hot tubs and even on boats

A non-abrasive material has other advantages compared to a conventional abrasive anti slip surface. Abrasive products are hard to clean, they possess a highly irregular surface that cannot be accurately controlled during the production process (the minerals are scattered or blown across the surface), the minerals help to create hidden areas where dirt or other contaminants can hide, with our non abrasive anti slip tapes this is not possible, all areas are exposed, no hidden areas exist. The non abrasive anti slip range can be cleaned by any existing cleaning regime. Our non abrasive anti slip range are viable products for use as anti slip flooring in areas that require strict cleaning rules, the areas can include food preparation, pharmaceutical manufacturing, laboratories etc.

Sizes

We can supply in any format including shapes and rolls.

Key Benefits

- Unique non-slip coating, possesses a high coefficient of friction
- No harsh grit granules
- Permanent adhesive coating
- Available in five popular colours – black, white, beige, grey and clear, others available on request
- Any width/shape available
- Easy, instant application
- A great anti slip marine tape
- Perfect for use as non slip bathroom flooring
- Creates excellent non slip flooring, an excellent anti safety flooring tape
- We have tested all the range for levels of grip, the tests include Pendulum, ASTM and DIN

As non slip bathroom flooring, or any other safety flooring for use in wet areas, you cannot go wrong with our Aqua safe or non-abrasive anti slip tape. Preventing slip and fall injuries for your guests, employees or your self within the workplace is vital, and having the correct, efficient safety flooring is key to this.
