# TAPECONCURRENT TAPE OP MAAT

# Anti slip tape

# Date: 23/12/2015

## Technical Data Sheet

#### Description

The product is a tough, durable selfadhesive anti slip material for application in a wide range of areas. The material is constructed from a self-adhesive plastic base film. The adhesive is pressure sensitive and is protected by a siliconised treated release paper. The upper surface consists of abrasive aluminium oxide particles held in place by a polymer resin. Prior to setting, the granules are charged by static electricity to help point upwards thus increasing grip levels.

#### Where to normally apply

Designed to provide grip in varied applications even if, once applied correctly, oil, water or other contaminants are present. Perfect for pedestrian traffic or light vehicular traffic.

### Advantages of using safety-grip

- Tough, durable.
- High levels of Coefficient of Friction; this is how grip is measured.
- Ease of application.
- Withstands most chemicals that are present in commercial environments.
- Will adhere to most surfaces if the procedures are followed.

#### Sizes

This product is produced in all sizes and shapes. Maximum width is 1168mm and maximum length is 100m.

### Packaging

Boxed in a variety of methods dependent on size or customer requirements. The case is marked with a label showing size, quantity, batch number and internal barcode. Other information is added as required.

### **Application instructions**

Please refer to the detailed application instructions.

Product durability

When applied typically 3 years.

#### Disposal

This product can be incinerated or disposed of through conventional methods; the waste disposal code is 20.01.04

#### **Product Origin**

Manufactured in the UK, either converted in UK site or in US.

#### **Coefficient of friction data**

Safety-Grip®	Dry surface test result	Wet surface test result
Standard	I02 TRL	71 TRL

<u>Temperature Range</u>			
Safety-Grip®	Temperature	Observations	
Black Standard Anti-slip	-40°C	No visible evidence of	
Таре		peeling or loss of adhesion	
Black Standard Anti-slip	+80°C	No visible evidence of	
Таре		peeling or loss of adhesion	

The above tests were conducted in accordance with Pendulum, the test was conducted at a recognised independent friction testing laboratory, and copy certificates are available on request. Pendulum is a dynamic test, for static tests, we also have results ASTM C 1028-96.

All the above data is for reference only.
